Applicant's submission filed on 12/31/2008 has been entered.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The closest prior art of record, namely, Fujioka et al. (US Patent No. 5,610,720) and/or Mandel et al. (US Patent No. 6,574,014) do not disclose, teach or suggest, a cradle assembly for supporting the document therein, said cradle assembly being attached to the base and including a first cradle half and a second cradle half, wherein each of the cradle halves further includes a cradle base joined to a book support plate by a linkage and a drive motor operatively coupled to the book support plate, such that operation of the drive motor displaces the book support plate in an arcuate manner relative to the cradle base; and wherein the support plates of the first and second cradle halves are joined by a flexible web of material, as claimed in independent claim 1.

(US Patent No. 6,574,014) do not disclose, teach or suggest, wherein each of the cradle halves of the cradle assembly comprises a cradle base joined to a book support plate by a linkage, each cradle half further having a clamp, and a drive motor suitably operatively coupled to the book support plate, such that operation of the drive motor displaces the book support plate in an arcuate manner relative to the cradle base; and wherein the support plates of the first and second cradle halves are joined by a flexible web of material, as claimed in independent claim 18.

The closest prior art of record, namely, Fujioka et al. (US Patent No. 5,610,720) and/or Mandel et al. (US Patent No. 6,574,014) do not disclose, teach or suggest, adjusting the position of the document by displacing at least one support plate in an arcuate manner such that at least one of the first and second pages are entirely within the field of view of at least one image acquisition device; displacing at least the outer edge of the second page from contact with subsequent adjacent pages; temporarily placing a vacuum head proximate to at least a portion of the surface of the second page; acquiring the second page with the vacuum head; turning the second page about its line of contact with the binding of the document until the printed surface of the second page is substantially congruent with the printed surface of the first page; and releasing the second page from the vacuum head, as claimed in independent claim 25.
